

Welcome to Australia Fair Dental Care

What to expect from your first visit with us

Australia Fair Dental Care was founded 30 years ago and still follows the same principles as when it first began. Our patients are the sole purpose of our business and their satisfaction is the most important thing.

To help you feel more comfortable in your visit with us, we have a guide on what to expect.

1. Initial Discussion

Our dentists are focused on providing options that best work with you, your situation, and your budget. To start, we will discuss any previous or current dental issues you have experienced and if you have any goals for your dental journey.

If you have any questions, concerns, or require extra care, please don't hesitate to let our friendly staff know.

2. Thorough Examination

Lean back and relax as our dentists perform a thorough examination of your teeth, gums, jaw, and mouth. We will record and discuss any previous dental work as well as ongoing or emerging issues we find. We may also perform X-rays if your dentist believes it's necessary to check if there are hidden problems or get an accurate look between your teeth.

3. Discussion of findings and treatments

After the examination, our dental team will discuss what we have found in easy-to-understand language. Our dentists will look to find the root cause of an issue, rather than just treating symptoms so we can prevent similar problems in the future. Depending on what we find, we will run through a range of treatment options available to you. Our dental services include dental implant restoration, orthodontics, dentures, wisdom teeth extractions, and more!

4. Payment Options

Whether you have just come in for a check-up or to decide on a treatment plan, our friendly team will discuss the different payment options. You can pay up-front or use AfterPay and pay for your dental treatments over 4 separate payments.
